

Climate Protection Certificate 2022

Solplast

makes a significant contribution to climate protection through the participation in ERDE and the successful collection and recycling of silage films, baler twine, bale nets, perforated-, mulching-, asparagus films and non-wovens in 2022.

By consigning these materials to recycling **42 748 tons of greenhouse gas** was reduced in absolute terms.

This corresponds to the CO₂ emissions which **3 080 902 trees** bind in Europe every year.

On behalf of the climate and the environment we say

„Thank you“.
